WAR RESERVE CURRENT VS PREVIOUS YEARS VALIDATION REJECT CODE  
ON CODE VRC ON SUBMISSIONS COMPARISONS

1. PURPOSE

The purpose of this report is to provide monitor with a listing containing those current year's submissions by DIC and the previous year's comparison quantities by respective DIC which breached the ON comparison criteria by Service for an NSN. Display is reflective of only the DIC or DIC within a Service for an NSN that were either ten (10.0) times greater or less by one-half (.50) than the previous year's requirements.

2. ORIGIN

This report is produced as a result of processes as performed in IAW chapter 59, The War Reserve Program.

3. FREQUENCY

This report is generated each time a war reserve computation is performed, usually each February, but may occur more frequently on an as required basis whenever HQ DLA-OSR deems/authorizes a new computation to be necessary.

4. FORMAT

a. Heading Line (Standard Identification).

b. Data Organization:

(1) Sequence:

(a) Major: By Service.

(b) Minor: By NSN, by DIC.

(2) Number of lines per page varies.

## 5. DISTRIBUTION AND RETENTION

Two copies of this report are furnished the monitors in the MSO, DSO to be retained until the purpose intended has been accomplished. Then disposition may be as deemed appropriate and IAW local procedures, the DLA Files, Maintenance and Disposition Manual, DLAM 5015.1 and chapter 59, The War Reserve Program.

## 6. PROCEDURES FOR REVIEW AND PROCESSING

Monitors will receive both copies of the report retaining one with annotations of actions/followups and forwarding the other copy to the submitting Service with RICs (From) contributing to the consolidated total which caused the Validation Reject Code ON. These RICs (From) are obtained through research of source data submissions retained from entry. Where time becomes a factor, a phone conversation may be more feasible and expeditious than the letter and an accompanying report when trying to meet the computation effective date. Where corrections are obtained reenter these into this current computation.
